# Written Smoke-Free Policies in Wisconsin County and Municipal Buildings As of January, 2006

## Background

The elimination of workplace exposure to secondhand smoke is a priority of the Wisconsin Tobacco Prevention and Control Program, Public Health Departments, and community anti-tobacco coalitions across the State. In addition, the 2006 Wisconsin Tobacco Prevention and Control Plan, developed by state, regional and local tobacco control leaders, establishes a goal that all municipal government buildings, facilities, and vehicles will be smoke-free by December 31, 2008. The purpose of this report is to describe the extent to which Wisconsin's counties and municipalities have established written policies making owned or leased buildings completely smoke-free. In addition, information regarding counties and municipalities which have some smoking restrictions in place is presented.

## Methods

In January and February of 2006, surveys were sent to the clerks of all counties, cities, villages and towns in Wisconsin (N=1,923). The surveys included questions about written and unwritten policies regarding smoking in county and municipally owned or leased buildings. Copies of the surveys are included at the end of this report. An overall response rate of 98% (n=1,769) was achieved through a combination of mailed reminders and follow-up telephone calls. Towns had the lowest response rate (97%), while 100% of counties responded.

This survey asked whether a current written ordinance or policy regarding smoking in county or municipal buildings was in place. The responses to this question are described below:

- Smoking is banned: Smoking is banned in every building owned or leased by the county or municipality.
- Smoking is restricted: Smoking is allowed in some buildings or some areas of buildings owned or leased by the county or municipality.
- No written policy: There are no written policies regarding smoking in county or municipal buildings (although there may be an unwritten understanding).
- Municipality owns no buildings: The municipality does not own or lease any buildings for which they could have smoking policies.
- DK/missing/survey not completed: This category includes missing answers, surveys that were not completed at all, and counties and municipalities for which the clerk did not know the current smoking policies. Most cases that fall into this category are incomplete surveys.

## Written Policy Standard

It is important to note that the current survey requests information on whether the smoking policy is in writing. Four previous surveys were conducted in 1996, 1997, 2001 and 2003. These surveys asked whether counties and municipalities had ordinances or policies on smoking in their buildings, but did not specify whether the policies were written, or simply a general understanding. Written policies are

the best way to ensure continuity of smoke-free environments through changes in personnel and administration. The 2006 survey changes that standard by asking whether a current written ordinance or policy regarding smoking in county and municipal buildings is in place. As a result of this change in methodology, data from the 2006 survey, as presented in this report, are not directly comparable to data from previous surveys.

## **Results**

Data regarding written policies for smoking in buildings owned or leased by every county, city, village and town are presented in this report. In addition, Table 1 summarizes these findings for Wisconsin and the five DHFS regions.

## **Acknowledgements**

This report was prepared as a collaborative effort of the University of Wisconsin Comprehensive Cancer Center's (UWCCC) Tobacco Surveillance and Evaluation Program and the Wisconsin Division of Public Health, Department of Health and Family Services (DHFS). Amanda Riemer Jovaag, Researcher, and Karen A. Palmersheim, Director, both of the UWCCC Tobacco Surveillance and Evaluation Program, and Jennifer C. Ullsvik, Epidemiologist in the Bureau of Community Health Promotion, Division of Public Health, were primarily responsible for survey construction, data analysis, and publication of this report. The University of Wisconsin Survey Center was contracted to provide assistance with data collection.

Support for this report was provided by the Wisconsin Tobacco Prevention and Control Program, Bureau of Community Health Promotion, Division of Public Health, Wisconsin Department of Health and Family Services.
